DETAILED ACTION

1. According to paper filed on Feb. 17, 2005, the applicants have amended claims 12, 38 and 48.
2. Claims 1-48 are now pending in the application.

Response to Arguments

3. Applicant's arguments filed on Feb. 17, 2005 have been fully considered but they are not persuasive regarding prior art rejections. The applicants have amended claims to overcome most of the indefiniteness rejections and furthermore, have made persuasive arguments regarding remaining indefiniteness rejections. In regard to prior art rejections, the applicants have amended claim 48 to delete some values of variables R20 and R21 to overcome prior art rejections. However, this amendment introduces new matter as discussed below in new grounds of rejection. Also, compound with RN 66523-49-7 named Ehanethiol, 2-[(1-ethenyl-4,5-diphenyl-1H-imidazol-2-yl-2-yl)thio] disclosed by Skvortsova does anticipate the instant claim when R21 represents aliphatic functionality since this compound has $-\text{CH}=\text{CH}_2$ group at the instant R21 position.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 48 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the

Art Unit: 1625

specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 48, the applicants have amended claim 48 to delete some values of variables R20 and R21. However, the specific species with different values of variables R20 and R21 are not disclosed. The compounds of formula V are disclosed generically on pages 12-13. There are only five species disclosed in table 1 of the instant specification. Out of these five species, four species have values of variable R21 as H while all five species have the value of variable R20 as aliphatic functionality comprising at least 4 carbon atoms. Therefore, this amendment introduces new matter in the claim.

Conclusion

6. All rejections under 35 U.S.C. 112, second paragraph are now withdrawn.
7. All prior art rejections of claim 48 are maintained for the reasons of record.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1625

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
